Re: Five-Year Review of Reclamation Estimate, Worthen/Williams LLC, Roudabush #1 Mine,
M045/027, Tooele County, Utah

Dear Mr. Williams:

Thank you for your response to my request for additional information concerning the Roudabush #1 Mine. In my conversation with you and in your response you stated that it may be two years before you will be required to blast for any additional material and that it will not be necessary to disturb any additional area for at least 20 years. I understood from our conversation that you had only been working from stockpiles since you acquired this permit in February of 2000.

Subsequent to receiving your letter, I reviewed the Roudabush #1 file for the information needed for the five-year review process. I found that General Refractories submitted the last maps that were furnished to the Division in January of 1990. Viewing the information furnished in 1990 and the production figures, submitted to the Division since that time, indicates that there is a good probability that site conditions have changed since that time. I apologize for the misunderstanding, but in order to review the current level of disturbance at this site, updated maps of the site will be necessary.

In view of this lack of current information, the Division requests that Worthen/Williams furnish updated maps and information originally requested to facilitate the five-year review and bond escalation.

Please furnish this information within the next 30 days, or no later than August 2, 2001. If you are unable to provide this information in this time frame, please contact the Division with justification for requesting additional time. Thank you in advance for providing the information to assist us in our surety review. If you have any questions concerning this letter, please contact me at (801) 538-5382.

Sincerely,

Doug Jensen
Senior Reclamation Specialist
